

That's How Long Our Love Will Last

The Dave Clark Five

If I heard a song in the sky
It would guide the love in your eyes
And it would shine forever, a lifetime
That's how long our love will last

If I had the sun from above
It would be the warmth of your love
And it would go forever, a lifetime
That's how long our love will last

Every little thing you say or do
All those little things are the reason
The reason why I love you

I know I can give you a star
But I'll be wherever you are
And we will stay together, a lifetime
That's how long our love will last
