

Planetation
Stick figures in mass quantity
Planetation
Where fame is the one eternal key
There's beauty up on that hill
See where Jack met Jill
Recalibrate your own reason for living

And the people climb the steeple
And they look for other people
And the people climb the steeple
And they look for other people

Planetation
Design a new life of your own
Planetation
Does reincarnation mean a clone?
Amazing shades of grace
Revolve at your own pace
And wake up to the sound of others spinning

And the people climb the steeple
And they look for other people
And the people climb the steeple
And they look for other people

Planetation
If you say what you mean, you mean what you say
Reaching the nights on corner day
Planetation
Maybe it's been fortunate that we met as fetuses
I don't know

Gas spinning 'round and 'round
Through stars and dizzy towns
And settle on the thought of planetation
(Kinda like this station, planetation)

And the people climb the steeple
And they look for other people
And the people climb the steeple
And they look for other people (Yeah)
And the people (And the people) climb the steeple
And they look for other people
And the people climb the steeple
And they look for other people, yeah

Planetation
