Set Me Off

The Expendables

Set me off on the first melody Give me that breath which I can breathe If there is nothing left in this life to satisfy Give me all that I need If only I could find A symbol or a sign To let me know everything's ok I guess I finally found A piece of solid ground So let me know before you put me down The life load the work load What do you have to show For this life for this life What gets you going what Keeps your blood flowing All I need is one song To keep me moving on Keep me moving on Keep me moving on What do we have, what do we have What do we have I said we got each other
