

# Summer Is a Curse

The FAIM

Burnt lips when the wind blows  
Black tint on the windows  
I can't see what the future holds  
But I wanna know

I tip toe on the dirt road  
Too hot for the devil  
I can't see what the future holds  
But I wanna know

It's like hearts don't bleed like mine  
All we need is time

The summer is a curse and I can't let go  
If you never try then you never know  
A broke city with a broken heart  
The summer is a curse and we fall apart

Dark days and a deeper cold  
If you never try then you never know  
A broke city with a broken heart  
The summer is a curse and we fall apart

Oh oh oh oh oh  
Oh oh oh oh oh

Sea breeze you convince me  
Yeah I don't need this city  
I could leave in a heart beat  
And you gotta know, yeah you gotta know

Hearts don't bleed like mine  
All we need is time

The summer is a curse and I can't let go  
If you never try then you never know  
A broke city with a broken heart  
The summer is a curse and we fall apart

Dark days and a deeper cold  
If you never try then you never know  
A broke city with a broken heart  
The summer is a curse and we fall apart

The summer is a curse and I can't let go  
If you never try then you never know  
Broke city with a broken heart  
We fall apart

The summer is a curse and I can't let go  
If you never try then you never know  
A broke city with a broken heart  
The summer is a curse and we fall apart

Dark days and a deeper cold  
If you never try then you never know  
Broke city with a broken heart

The summer is a curse and we fall apart

The summer is a curse and I can't let go  
If you never try then you never know  
Broke city with a broken heart  
The summer is a curse and we fall apart
