

Get Together

The Human League

It's so easy to give up
Nothing ever goes right
Nothing ever seems worth the effort
Nothing's worth the fight
Setbacks happen all the time
Life's still there to seize
Nothing good comes easily
So climb up off your knees

Stand you can leave your fears behind find a better way
With the strength we have combined make it easy
Get together for the benefit work together unite the opposite
Stay together for the sake of it and get it right

Human hearts are so fragile
Fate and nature so strong
If we fail to get together
We can't last too long
Reach out for that better place
You can occupy
Find the courage to make the difference
Hold your head up high

Stand we'll be standing by your side you will find your way
You can regain all your pride take it easy
Get together for the benefit work together unite the opposite
Stay together for the sake of it and get it right

Stand you can leave your fears behind find a better way
With the strength we have combined make it easy

Get together get together
Get together for the benefit work together unite the opposite
Stay together for the sake of it and get it right
Get together for the benefit work together unite the opposite
Stay together for the sake of it and get it right
Get together for the benefit work together unite the opposite
Stay together for the sake of it and get it right
