

Cherry Street

The Icarus Account

Love I know that I've been away for a while
But I swear it's gonna be alright
As soon as I see that smile

Oh and tell me what's it like to be loved by you
Cause everybody wants to be loved by you
And oh I want to feel it again
I want to feel it

It's the way she looks in the city lights
With everything around her she's still shining bright
Take me to the place that we used to meet
By the little oak tree down on Cherry street

And don't baby don't think I'm letting you go
I can blame it on the winter cold
You know it gets bad on the road

Oh and tell me what's it like to be loved by you
Cause everybody wants to be loved by you

It's the way she looks in the city lights
With everything around her she's still shining bright
Take me to the place that we used to meet
By the little oak tree down on Cherry street

And oh I wanna feel it again
Ooooh I wanna feel it again
Again again and again
(Tell me what's it like to be loved by you
'Cause everybody wants to be loved)

Tell me what's it like to be loved by you
'Cause everybody wants to be loved by you

It's the way she looks in the city lights
With everything around her she's still shining bright
Take me to the place that we used to meet
By the little oak tree down on Cherry street
