Devil Running

The John Butler Trio

A sun does rise from distant lands Tears run and fires burning He finds first place with dirty hands He graduates man without learning Agenda set So long ago This son's a puppet with a master The hands stand still right by his side Middle finger on the button of disaster

And most of us we stand and watch Like old lady getting handbag stolen It's time to chase, chase them criminals I see the devil and the devil is running

Bad buisness ties turn out sour Backstabbed man nothing forgotten And in an unforgotten hour Seeds fall from an apple rotten Now hate and fear have thier own way And don't the scum just love the distraction Black blood will need to be lanced And when it's found you just blame The guilty faction

And now it's time not just to watch Like old lady getting handbag stolen It's time to chase, chase them criminals I see the devil and the devil is running

And now it's time not just to watch Like old lady getting handbag stolen It's time to chase, chase them criminals I see the devil and the devil is running

And now it's time not just to watch Like old lady getting handbag stolen It's time to chase, chase them criminals I see the devil and the devil is running
