Overdose

The Letter Black

Some people feel the void inside They try to fill the emptiness With anything in touch or sight They try to ease the pain

The void affects everyone
But how we respond is up to us

I can feel you now like a virus in my veins
I want you more and more
Jesus you're my overdose

People have sex and drink to death And some depend on drugs for peace But nothing else can satisfy I think it's time for change

The void affects everyone
But how we respond is up to us

I can feel you now like a virus in my veins
I want you more and more
Jesus you're my overdose

I can feel you now like a virus in my veins
I want you more and more
Jesus you're my overdose
