

Machine Gun

The Living End

Like a machine gun you command
Always in control and making plans
Never one to give a second chance

And never one to walk away
Or settle for the easy way out
Never one to walk away
'Til you lose your game

Battle in the old town
Battle in the old town
They'll take it all away from you
Better give it up now
You'd better give it up now
They'll take it all away from you

You're getting closer to the edge
Shot, paranoid, running scared
And you're about to lose it, so choose it
Don't do what you'll regret

And never one to walk away
Or settle for the easy way out
Never one to walk away
'Til you lose your name

Battle in the old town
Battle in the old town
They'll take it all away from you
You'd better give it up now
You'd better give it up now
They'll take it all away from you

I see through you
I see through you
I see through you
I see through you
