

# After You Came

The Moody Blues

Since it began I've got one dream  
And really it's my only blessing  
If I can come through then so can you  
And you will find there's no regretting  
Things that you want from your life's font  
Will never let your spirit grow  
Come back to earth for what it's worth  
For you've been dreaming of the ceiling not a home

I've been doing my best  
What else can I do?  
Is there something I've missed  
That will help you through?

I've reached the top of my wall  
I've found another way to fall

For some short time  
For a while you and I  
Were joined to eternity  
Then we're split in two  
Back to me and you  
Like the rain rising from the sea  
Rising from the sea

We all can see what we shall be  
But knowing's really not controlling  
With time perhaps I'll pass the traps  
And find some peace and understanding  
After you've come and while you're gone  
You leave me guessing it's depressing  
Never to know the way to go  
To find some time along a little less pressing

So you just have to laugh  
When it hurts so much  
You're so far away  
And so hard to touch

I've reached the top of the wall  
And all I've found  
Is another way to fall

Since it began I've got one dream  
And really it's my only blessing  
If I can come through then so can you  
And you will find there's no regretting  
Things that you want from your life's font  
Will never let your spirit grow  
Come back to earth for what it's worth  
For you've been dreaming of the ceiling not a home

I've been doing my best  
What else can I do?  
Is there something I've missed  
That will help you through?

I've reached the top of the wall  
And all I've found  
Is another way to fall
