

Honey Spiders

The Parlotones

Deliver life to me
In a belly of a honey bee
Fall in love with solemn nature's
Beek spells out it's melody

I live honey
Honey, I want more
I drink honey
Honey, I drink it all
You say I'll tire of honey

Honey I,
Honey, honey, honey,...

I wont tire at all

Leave me on this silver cross
Painted by the morning frost
Pluck that songstress from the sky
Who's melody tantalize

Place those flowers on my eyes
So it's perfume weeps into my eyes
Smother that honey popped
Upon my mouth and inside my mouth

I live honey
Honey, I want more
I drink honey
Honey, I drink it all
You say I'll tire of honey

Honey I,
Honey, honey, honey,...

I wont tire at all
I wont tire at all

Hold on, look out the Spiders
Hold on, look out the Spiders
Hold on, look out the Spiders
Hold on, look out the Spiders

The sharks nearly swallow romance.
The sharks nearly swallow romance.

Deliver a life to me
In a belly of a honey bee
Break of the edge of a rainbows pallet so I can paint my memories.

The sharks nearly swallow romance.
The sharks nearly swallow romance.

Hold on, look out the Spiders
Hold on, look out the Spiders
Hold on, look out the Spiders
Hold on, look out the Spiders
