Turn Me On

Turn me on 'cause I need it now Turn me on 'cause I don't know how Pick me up and shake me Tune me in and take me Lights are bright and the music's loud

Let me know what I need to know Make me go where I want to go Let me stand and wonder Let me feel the thunder See the lightning and the picture show

Put your hand on the power

Turn me on again and again Say you're always gonna be my friend Love me like you mean it Make a mess and clean it Don't you stop 'til I tell you when

Got a feeling something's taken hold 'Cause I'm flying by remote control No misunderstanding Before I make a landing I'll lose my mind and I'll trade my soul

Put your hand on the power

When I look you in the eye Then it's everything I need Let me look you in the eye 'Til the spell comes over me

Turn me on Making the colors bright Turn me on Making it go all night

Turn me on Giving me louder sound Turn me on Making it spin around

Turn me on Sing and dance for me Turn me on Keeping me company

Turn me on Making it fast and hot Turn me on Give me a different shot

Put your hand on the power and

Turn me on Making the colors bright

The Tubes

Turn me on Making it go all night

Turn me on Giving me louder sound Turn me on Making it spin around

Turn me on Sing and dance for me Turn me on Keeping me company

Turn me on Making it fast and hot Turn me on Give me a different shot

Put your hand on the power And why don't you turn me on
