

# Don't Think About My Death

The Wood Brothers

There's a bottle on the table  
There's a fire in the glass  
There's a long list of things I should be doing  
I'm not gonna get very far tonight  
I'm not gonna get very far

It's late in the evening  
I woke up an hour ago  
There's another bed where I should be sleeping  
I'm not gonna get very far tonight  
I'm not gonna get very far

I will get by starin' at the moon  
I will get high all alone in my room  
I will survive these stories in my head  
When I'm loving you I don't think about my death  
When I'm loving you I don't think about my death

There's a bible in the drawer  
There's a highway out the window  
There's another road I should be traveling  
I'm not gonna get very far tonight  
I'm not gonna get very far this time  
I'm not gonna get very far

I will get by starin' at the moon  
I will get high all alone in my room  
I will survive these stories in my head  
When I'm loving you I don't think about my death

I will get by starin' at the moon  
I will get high all alone in my room  
I will survive these stories in my head  
When I'm loving you I don't think about my death  
When I'm loving you I don't think about my death  
When I'm loving you I don't think about my death
