

Candy Ghosts

Tiger Army

And it's coming down, see the rain under streetlights
I feel lost again, but I know where I am
Colored lights in mist, floating like candy ghosts
Where it all began - and I'm back once again

How far to go, I return like a boomerang
How far to fall, rocket into the sky
An apple to the earth, stay away from the poison
You must find your way home when you wander through the night

Glowing in the night, they've been forever and always
And the memories, they keep the glow within
But you cannot stay here with the ghosts forever
For if you do, if you do, the future won't begin

And you'll remain floating... floating
Like candy ghosts, stars in the sky, forever in the night
