

## Last Ride

Tiger Army

After all these years we still roll on  
Like radio waves from a station long gone  
Beaming through the night from a summer past  
That you can't forget  
We're still here, for right or wrong  
If you still ride with us this is your song  
We never die, we never weep for tomorrow

It won't be long until we're below  
Time is shorter than you think so let's go  
It won't be long until we're below  
You know that we've got to make the most  
This could be our last ride

I am surrounded by the night  
The engine hums, I remember those times  
And those of us no longer here – we had no idea  
I keep on rolling all the time  
Another state, another county line  
Can't explain the way I feel inside  
So let's ride

It won't be long until we're below  
Time is shorter than you think so let's go  
It won't be long until we're below  
You know that we've got to make the most  
This could be our last ride

It won't be long until we're below  
Time is shorter than you think so let's go  
It won't be long until we're below  
You know that we've got to make the most  
This could be our last ride
