

# Fear Not

Tinashe

What happens when life breaks down?  
When there's systemic contradiction?  
It's projecting, self-justifyin', excusing, accusing  
Denying well I don't have a problem  
There's nothing wrong with me  
So if it's not me, it must be you  
Or it must be them, or it must be him  
Trouble doesn't come from nowhere  
Your weakness is a perfect match

Trouble in my life, working for a cause  
Chasing my ambitions giving it my all  
How you're supposed to lift your own feet off the ground  
When the whole damn world still trying to bring you down?  
(Trying to bring you down, trying to bring you down)  
The whole damn world still try to bring you down  
(Trying to bring you down, trying to bring you down)  
Ohhh

And I'll dance til you won't be, loving being me  
Broke out the months and the gun society  
I'm on a mission just you wait and see  
Fuck what you told me, love and living free  
(Love and living free, love and living free)  
I said fuck what you told me, love and living free  
(Love and living free, love and living free)  
Ohh

Yes said there's something out here  
Trying to take a hold on me  
Can't turn me down, cuff and chain my feet  
Just skies above this town baby  
Just prepare 'cause I'm about to get the whole world out of the  
re  
And I know what you do, I'm not afraid to you  
Someone looks to me ohh

Fear not, oh yes tonight  
My love, fear not  
My love I got you  
Fear not, uhh I got you  
I got you always
