

All Coming Together

Tom Paxton

There's some high-drifting clouds to the east of me
And a warm summer sun on my skin
There's a songbird who thinks he invented his song
And I'm not gonna to argue with him
There's a peace in this place; it's contagious
There's a mood on the bright side of blue
It's a feeling I've waited a long time to find
And I did want to share it with you

Feels like it's all comin' together
Feels like I'm on the best kind of the road
Feels like it's all comin' together
Feels like love way down to my soul

It's been years since I felt like a kid again
It's been years since I laughed right out loud
For I thought of myself as a serious man
I provided my own thundercloud
Now, it's feels like a bright sun is shining
And it's chasing the shadows away
And it's high time I told you I love you again
And it gives me a good chance to say

Feels like it's all coming together
Feels like I'm on the best kind of the road
Feels like it's all coming together
Feels like love right down to my soul

Feels like it's all coming together
Feels like I'm on the best kind of the road
Feels like it's all coming together
Feels like love way down to my soul
Feels like love way down to my soul
Feels like love way down to my soul
