

# Take Me Down

Tonight Alive

I don't have a lot to say  
I'm short on my words today  
But either way you should know  
You won't get away too easy this time

You've got another thing coming if you think your coming over tonight  
It's never going to be fun when you just try too hard to make it right

Take me down  
Bring me down with you,  
you know what to do  
C'mon baby, break me out  
We can run away  
Nothing left to say  
But I want you to know that I need you now  
I know that nothing will bring us down

Well I don't mind you under my skin  
Watch life slip out and love seep in  
You'll never know how much I have to show  
With time you'll learn to let it go

You've got another thing coming if you think your coming over tonight  
It's never going to be fun when you just try too hard to make it right

Take me down  
Bring me down with you,  
you know what to do  
C'mon baby, break me out  
We can run away  
Nothing left to say  
But I want you to know that I need you now  
I know that nothing will bring us down

So why won't you,

Take me down  
Bring me down with you  
You know what to do  
Common baby, break me out  
We can run away  
Nothing left to say  
But I want you to know that I need you now  
I know that nothing will bring us down
