He's not the only one To think that things are going wrong And all around is only second best

Time was when all was fair
And we built solid castles in the air
He said that back to back in time's the way to go

Better in my day I hear everybody say But then they'll still be saying it tomorrow

It's so hard to take it When your time is over Yes it's hard to take it When you try to remember

Better in my day In my way Can't you see

Better in my way Here today Don't you see

I remember well he said When great men led the way instead Of manicure and media-hugging style

But I don't know what to do From now on we'll always lose He said that back to back in time's the way to go

Better in my day I hear everybody say But then they'll still be saying it tomorrow

It's so hard to take it When your time is over Yes it's hard to take it When you try to remember

Better in my day In my way Can't you see

Better in my way Here today Don't you see

He's not the only one To think that things are going wrong And all around is only second best

But I don't know what to do From now on we'll always lose He said that back to back in time's the way to go The only way to go Try to remember

Oh, better in my day Better in my way
