

# Hey

Too \$hort

He, he he hey  
He, he he hey  
He, he he hey  
He, he he hey

If you ain't busy later on, I'm a play a new song  
You could sing along, and if you say it's too long  
I'm a put the tip in, it won't go too deep  
I'm sure it's everything you always hoped it would be  
Last year, the time wasn't right for us  
But now, I can't fight the lust  
I wanna be all alone with you  
So we can do everything the song says to

Walk up and kiss my shoulder  
Whisper something sweet in my ear  
Tell me, boy, that I need to know  
Promise I never bore ya  
Got that special place for ya  
Can you be the reason I grow

Cause I feel you tingling in my bones  
Cause I love when your number go across my phone

Take a little sip, have a little smoke  
Listen to the music and take it real slow  
Ain't no rush, we waited this long  
For the moment, the right day to get it on  
I see it in your eyes, you're surprised  
Never would have thought I would be this size  
I'm in between your thighs, now you realize  
This is what we doing for the rest of our lives

Me and my dude used to fight about it  
All night I knew something wasn't right about it  
That's why you can't settle in with anybody  
So now I'm cool  
Didn't call, trying to keep a low on the drama  
Unfinished business, so I know I'm glad I found ya  
Plus I'm a big girl and I wanna show what I can do

Cause I feel you tingling in my bones  
Cause I love when your number go across my phone

What's up, baby? I wanna fuck with you  
I wanna hold you close and touch you too  
Back then, we ain't have much to do  
But things change, and now we stuck like glue  
Used to love him, now you don't trust that dude  
You with me every day, so it must be true  
It's the game, can't be real without it  
If you choose it, tell me how you feel about it

On my way to the hideout  
Won't you please hold me close  
Take everything but my business just to fuck with you
