## Welcome to England

Do a dance for me Baby it is late still you pour me a tall one... Go on, let the liquid take off what you're on.

You've been down before Boy and I like this I'm in quicksand I am sinking fast

Perfect, heal it Because your other half has got himself A devil's excess or Access

Welcome to England, he said Welcome to my World

You better bring your own sun, sweet girl You gotta bring your own sun Don't you forget your Bring your own sun Just enough for everyone

Heels on, go on Bang a tango but do not get tangled Who can stay strong When they only give us lies to lean on

When your heart explodes Is it deathly cold You must let the colors violate the Backness the rest A magic world in parallel So leave your daily hell

Welcome to England, he said Welcome to my World

It's not a question, if I can Fight by your side And withstand Anything but But I forgot That you said, girl If you come...

You better bring your own sun, sweet girl You gotta bring your own sun Don't you forget your... Bring your own sun Just enough for everyone

Welcome to England

**Tori Amos**
