

## Just Let Me Be in Love

Tracy Byrd

My breath is short, my heart is beating fast  
Every time I smile at her she's smiling back  
If I'm dreaming, please just let me sleep  
Anyone can see that she's too good for me  
Oh, give her time, she'll find out soon enough  
Just let me have and hold her 'til she does

What we've got going on is so incredible  
This chemistry between us feels so wonderful  
But knowing me, I'll probably  
Find a way to mess it up  
Who knows, who cares, right now  
Just let me be in love

Don't concern me with reality  
Don't convince me she's too heavenly  
Forget the future, disregard the past  
Those are questions I don't want to ask  
To my heart, all that matters is tonight  
Just let me live this moment in her eyes

What we've got going on is so incredible  
This chemistry between us feels so wonderful  
But knowing me, I'll probably  
Find a way to mess it up  
Who knows, who cares, right now  
Just let me be in love

What we've got going on is so incredible  
This chemistry between us feels so wonderful  
But knowing me, I'll probably  
Find a way to mess it up  
Who knows, who cares, right now  
Just let me be in love

Who knows, who cares, right now  
Just let me be in love  
Let me be in love  
I just want to be in love
