

To Be The One

Trespassers William

Oh I,
when are you truly there
do you think about the world
how far this time to be yourself
must you go down the street
floating on the top is better
and you know just what you are

what you are talking about is pure
what you're talking about is pure
and what you're talking about is pure

what you're talking about must
be the dream beyond the words
it gives weight and steers itself
how far this time to be the one
that you knew was always there
won't you take the time to get it
so you know just what you are

what you are talking about is pure
what you're talking about is pure
and what you're talking about is pure

what you're talking about
will hang the sun every day to melt you down
will hang the sun every day to melt you down
