

Stillness Of Night

Tribal Seeds

In the stillness of the night
Imaginations run wild
Can't help to think about you and I
In a mental paradise
Girl I need you love like the trees need the sun
Relying on your touch
And only you can deliver
Water feels the herb and the herb's buds sprung
Such is your touch when I mon lay down
Come now darling let us share some love and affection
Share it in the night till the rising of the sun
Come now lady let us vibe and our hearts become one
For you are the inspiration of I song

Girl you know you caught my eye
And you make I feel alright
In the stillness of your night
I'd like to be at your side

So tell me girl are you the one
In I thoughts in I dreams punishing me
Said I know my chances are so very slim
But it's I hope that keeps I and I pushing
Cuz in this world you can never win
I mon is forced to keep fighting
No matter how troubled I water
You always come and still it daughter
No matter how troubled I water
You always come and still
The night, steady is your vibe
Come little girl and share your love with I
Still is the night, steady is your vibe
Come little girl and share your love with I
Cuz it is you running through my mind
And it's true in the stillness of night
It is you running through my mind
And it's true in the stillness of
The night, the night, the night
