

White Lines

Tygers of Pan Tang

I spent all night on the highway
Can't believe how far I've come
Is there light at the end of this journey
Tell me when will I be done

There's something following behind you
Is it something in your head
I gotta find a way to ignore it
I'll find the answer up ahead

White lines, leading me on leading me on
White lines, down this never ending road
White lines, driving me wild driving me wild
White lines, it's a never ending road

Spent every weekend at a party
Can't believe the things I've done
No time for sleep when you're riding a white horse
Lost inside the rising sun

There goes that voice again behind you
Are you sure that way you hear
You gotta find a way to ignore it
Got to learn to crush your fears

Is something following behind you
Is it something in your head
You gotta find a way to ignore it
You'll find the answer up ahead
