

Call My Name

UFO

* I want you to call my name
I need to hear your voice again
You know I want you to call my name
Any time, there's no shame in our love
I met you watching the cars go by
You were there, every night, at the corner of elm and vine
And you had nothing to hide
For just a few bucks and you know it's a free ride
* repeat
I picked you up for all the wrong reasons
You left home for hollywood, where there's no break even
We had nothing to hide
You were just a few years on the wrong side
* repeat
It's only love, I know, a real love
I know it's only love, and you showed me how
Gotta keep you now
[instrumental]
We had nothing to hide
You were just a few years on the wrong side
* repeat
In our love...in our love...there's no shame in our love...
