

I'm Pretty Sure I'm Out Of Luck And Have No Friends

Underoath

Breathe in, breathe out, breathe in, you're fine
All of this is in your mind
Focus on the rising sun, slow down

It's all in my mind

Come down, calm down, you took too much
It's disgusting and obvious

Fucking breathe and check the pulse
No one knows you're here alone
Focus on the rising sun
No one knows you're here alone

It's all in my mind

Don't you drift to the light ahead
There could be something left
Gotta clean up yourself
Before you fade away

Don't you let me fade away, fade away
Fade away, fade away
It's not in my head, in my head
It's not in my head, in my head
