

The Created Void

Underoath

Let's do this for each other
Let's do this for truth
I give for You, You give for me

Let me take You somewhere I cannot explain
I wanna take You somewhere I cannot explain

I'm stumbling right in front of You now
I won't refrain from guiding You there

Normal is not so far

Was it just a dream
Or something much more
We are not alone
Since You agreed to follow

It's all in my head, if You want you can look inside
There's nothing but red and all the mess I've been
It's all in the way I say what I don't mean and mean what I don't
I need to speak of You and what is real

They will never understand
What eats at our insides

It's all in my head, if You want you can look inside
There's nothing but red and all the mess I've been
It's all in the way I say what I don't mean and mean what I don't
I need to speak of You and what is real
