Nursery Rhyme / Breather

Does it mean I never let you know Each time I turn inside When I fully grow I'll outsize you But I won't let you fall in love You know it flows over me And you won't let me drown inside

Sing a nursery rhyme to keep me quiet Sing a nursery rhyme to keep me quiet Woman please stay close to me, close to me Carried through your ecstasy

You can't stop me breathing Even when you're on fire Know that you're weaving With my emotional wires Flows through me In through me Out through me Over me Feeling me Feeding me Electrically

It's electric ballroom love

I have to breathe the air you breathe I'm inside you In a room inside a room I'm inside you The colour changes Follow your emotion I can see when you're feeling desire I feel him close to you While I just walk around inside you Don't let him close to me Not when you know it's not the one The one You love

It's electric ballroom love Keep me quiet

Won't you sing me a nursery rhyme To keep me quiet while you're on fire

Please just sing me a nursery rhyme To keep me quiet while I'm inside

I won't let you fall in love You know inside the baby knows

Your baby knows

You're on fire

Keep me quiet

Breathe the air you breathe
