

It's not worth  
Wasting your energy  
On a fight that is fixed  
You're keeping all of us sick

You're not being fair  
To your enemies  
You're fighting our fists  
With knives  
You're outrunning all of us

If we could reach  
We would all just choke you (2x)

if we could we would  
And we're going to  
But there's a day  
After this one  
After all we voted for you

All the things  
You said we'd have  
A car to every house  
The power to choose  
And live free lives

If we could reach  
We would all just choke you (2x)

But we can't reach

we can't reach (4x)

But we could reach  
We would all just choke you

And if we could read  
We could argue against you

And if we could unite  
We could bring you down

If we could think  
We could all outwit you
