

Every Little Thing You Do

Westlife

Hello, let me know if you hear me
Hello, if you want to be near
Let me know
And I'll never let you go

Hey love
When you ask what I feel, I say love
When you ask how I know
I say trust

And if that's not enough

It's every little thing you do
That makes me fall in love with you
There isn't a way that I can show you
Ever since I've come to know you
It's every little thing you say
That makes me wanna feel this
There's not a thing that I can point to
'Cause it's every little thing you do

Don't ask why
Let's just feel what we feel
'Cause sometimes
It's the secret that keeps it alive
But if you need a reason why

(Chorus)

Is it your smile or your laugh or your heart?
Does it really matter why I love you?
Anywhere there's a crowd, you stand out
Can't you see why they can't ignore you
If you wanna know
Why I can't let go
Let me explain to you
That every little dream comes true
With every little thing you do

It's everything, everything you do
That makes me fall in love with you
It's everything, everything you say
That makes me feel this way
