

# You Are We

## While She Sleeps

You are we

Here lies our addiction  
The price is a truce  
To hide the afflicted right under our nose  
Tyrants deprivers of truth  
Take what you can  
We've got nothing to lose

So come and get it  
We've got nothing to lose  
Yeah I fucking said it  
Deprivers of the truth

To be honest they force this upon us  
Show us the path  
Paved with glass  
Sentiment at last  
The knife behind your back

Our smoke will paint the sky  
Cover up the lights that guide us  
Celebrate decline  
We made our bed and I will lie to you  
That everything's alright  
We'll dam the river  
We'll dam the river and try to

Hide from the water  
Pre creation in the reign of sin  
If the land has been swallowed  
We'll learn how to swim  
Begging for our sorrow  
The tides are turning

You want your countless wars  
We want to count less wars  
You want to point the blame  
At the heretics  
But you're the hypocrites  
Its only hate you preach  
And when we call for peace  
You call it anarchy  
I hope your god can save you  
As your devil leads the way  
Yeah

We've got nothing to lose  
So come and get it  
We've got nothing to lose  
Yeah I fucking said it  
Deprivers of the truth

It's like raking dead leaves in the wind  
It's like saints living life without sins  
It's like digging our graves in the sand  
It's like raking dead leaves in the wind

Our smoke will paint the sky  
Cover up the lights that guide us  
Celebrate decline  
We made our bed and I will lie to you  
That everything's alright  
You are we  
You are we  
Lucifer  
You are we
