

# Come Down

White Lies

I felt loved last night for the first time in a long time  
It feels like coming home to stay  
Like falling in the sea when it's too hot in the sun  
But made things so much worse today

I know you said you'll miss me  
But I know that you won't  
Because time is like a wave  
That washes all the pain away  
When you come down

I know I said I'll see you  
When it gets to New Year  
But now that all the rain's stopped falling  
All I think is getting out of here

I felt loved last night for the first time in a long time  
It feels like I never went away  
Like drifting back to sleep  
When I'm aching and I'm tired  
But made me feel so much worse today

I know you said you'll miss me  
But I know that you won't  
Because time is like a wave  
That washes all the pain away  
When you come down

I know I said I'll see you  
When it gets to New Year  
But now that all the rain's stopped falling  
All I think is getting out of here

I know I'd be welcome but tell me how far  
Ceremonial knocks  
Sounds the gaps in my heartbeat  
And I'll never be good enough for you or for me  
I've buried my pride  
I've buried my key (2x)

I know you said you'll miss me  
But I know that you won't  
Because time is like a wave  
That washes all the pain away  
When you come down

I know I said I'll see you  
When it gets to New Year  
But now that all the rain's stopped falling  
All I think is getting out of here
