

Stand In The Water

Wildlife

Meet me down by the river
Meet me down by the river
Meet me down there
Don't matter which river
Don't matter which river
They're all going somewhere
They're all going somewhere

Just as long as you're looking for me

I can be a good friend
And I can be a good lover
I can be a good lover
But I can't do both of them
No I can't do both

Just as long as you're looking for me

Come stand in the water
Come stand in the water
Tell me that you don't care
Shaking and shivering
Time is making jokes at my expense
Dancing in the river bend

Just as long as you're looking for me

They're all going somewhere
