

Put Me On

Will Downing

Did you have a long day?
Do you need a getaway?
I'm inviting you to fall
Deep into my love storm

Will can make it okay
Hit repeat, repeat for play
Anytime of day you want
I will be your quiet storm

When you're in the mood
And you need my voice to soothe
Come here, baby
You got to put me on, put me on

I'll make it nice and smooth
Anything to help your body move
Keep it sexy, put me on

When I'm in your ride
Girl, I'm right beside
Sing to you real soft like
This here right in your ear, girl

Forget about the grind
I'm your lover's guide
Listen while I touch your heart
Just lay back, lust, that's fine

Say girl, tell me the last time
You had a minute to yourself
Meet me in the background
So I can look at you

I'm looking at you right now
And all I gotta say is wow
I could never turn you down

When you're in the mood
And you need my voice to soothe
Come here, baby
You got to put me on, put me on

I'll make it nice and smooth
Anything to help your body move
Keep it sexy, put me on

Less is more
When those clothes drop down to the floor
That's alright, baby
Put me on

Baby, do you wanna get yours?
Let me show you how to explore
So tonight, baby
You got to put me on
