

White Flag

Wolves At The Gate

Feel the pain of falling embers
Fade and burn as I surrender
Raise the white flag for my life

Disarm the hate and heal the wounds of pain that's self-
inflicted
This mutiny has left behind

I feel it burning on inside my bones (Inside my bones)
All the wars that left me here to die, die
(Left to die)

Feel the pain of falling embers
Fade and burn as I surrender
Raise the white flag for my life
Feel the rain that washes over
All the guilt that I had shouldered
Raise the white flag for my life

Oh, sing the song of victory that heals the broken rebels
That kills the lie that's left behind

I feel it burning on inside my bones (Inside my bones)
All the wars that left me here to die, die
Left to die (Left to die)
Left to die (That left to die)

Feel the pain of falling embers
Fade and burn as I surrender
Raise the white flag for my life
Feel the rain that washes over
All the guilt that I had shouldered
Raise the white flag for my life
Raise the white flag for my life
Raise the white flag for my life

Raise the white flag, sing it
Sing victory
Raise the white flag, sing it
Sing victory
