

It's All Over

Wynette Tammy

Arms wouldn't you like to hold her
Don't you know she'd feel so warm right next to you
Lips wouldn't you like to kiss her or would you tell her lies
The way you used to do

But it's all over over all except
The loneliness that gets to you somehow
Over over might as well admit
That it's all over now

Eyes wouldn't you like just to see him
Walk through that door and end this lonely night
Heart wouldn't you like to start living
And know for sure that things would turn out right

But it's all over over
