

The Explanation

XXXTentacion

17

My collection of nightmares, thoughts,
and real life situations I've lived
17 is the number tattooed on the right side of my head
My own personal number
Soon to be explained in future interviews or instances
By listening to this album, you are literally,
and I cannot stress this enough, literally entering my mind
And if you are not willing to accept my emotion
and hear my words fully, do not listen
I do not value your money
I value your acceptance and loyalty
Here is my pain and thoughts put into words
I put my all into this, in the hopes
that it will help cure or at least numb your depression
I love you
Thank you for listening
Enjoy
