

I Found You

Zug Izland

Life was shitty, can't call it
My karmas, been falling
Either they're all hit
Or so low, they're crawling
Been on my quest for all my life
These hoes look blessed
But they're hella trife
I gave my trust
And for that got crushed
I've searched, tried, chased, spied
But now I can resign

Because I found
(I finally found you)
I fucking found my baby
(I finally found my baby)

Explored, entrenched
All the rest failed my test
Medusas with witches brew
What these bitches will do
I drank the kool aid too
I gave my trust and for that got crushed
I've had my world to dust
I've plowed, creeped, spied, deceived, crept
But now I can see

Because I found
(I finally found you)
I fucking found my baby
(I finally found my baby)

I was ready to give it all up
And settle for some dumb slut
Out of prospects and places to try
But then you busted through right into my life
I gave my trust and for that got crushed
I've had my world to dust
I've looked, searched, chased, hawked
But now I can walk off
I bowed, creeped, soared, seeked, crept
But now its the shit

Because I found
(I finally found you)
I fucking found my baby
(I finally found my baby)
