

Love

070 Shake

Said I found the one
That's enough for me (That's enough for me)
Run past the gun
Love me endlessly

Heavy lies the crown, preachers tired too
Reach inside my mind and tell me where you want to go

Love is you
Your company's enough
Love exists, love exists, and it's coming home to me

Love is you
Found the cure to your disease
Poisoned you, poisoned

Yeah
You know what I did
Why would I lie?
Hey
You know what you did
Hey, you know what you did

Still 27 minutes away
It's gone already
Had it for a moment
It doesn't go in circles like you wanted it to
Doesn't come back
You knew that already
You knew that

Does it come from the stars or comes from somewhere further?
It doesn't come from the stars, it comes from somewhere further
It's always been a joke
You kidding me?

This is it, huh?
This is it?
That's all you needed me for
That's all you wanted me for

We'll start again sometime
Start again sometime
I love you
