

Lungs

070 Shake

Ready or not you got trapped in a maze
Where've you been since the minutes turned to days
Stay by my side when the pendulum swings
Stay by my side when they love turns to hate

If the sun explodes and there's nowhere to run
Would you come with me to go find another one?
I'll follow you to our afterlife love
I wanna inhale your life in my lungs

What comes first, the high or the drug?
What comes first, the love or the heart?
Made a bad decision, I ain't listen to God

'Cause it's too much baggage I had to carry on
I asked for help and it did me no good
I asked for help and it did me no good

If the sun explodes and there's nowhere to run
Would you come with me to go find another one?
I'll follow you to our afterlife love
I wanna inhale your life in my lungs
