

Skin And Bones

070 Shake

And we spoke in past tense
Reminisce 'bout back when our spirits used to dance with each other
We been smoking gas, yeah
This is so romantic, I never wanna press fast forward
You treat me like I'm more than a pair of skin and bones
And that really made a difference in my story
Life will take its toll
But whichever way we go
Know I'm right here by your side, shawty

Skin and bones under the covers
Kept our love undercover
Nonchalant, very subtle
Tryin' not to step on the puddle

Write on your flesh
With permanent ink
Light the incense
Remember this scent

High as a bitch
But you won't catch me slip
I know nothing
I know I don't

And we spoke in past tense
Reminisce 'bout back when our spirits used to dance with each other
We been smoking gas, yeah
This is so romantic, I never wanna press fast forward
You treat me like I'm more than a pair of skin and bones
And that really made a difference in my story
Life will take its toll
But whichever way we go
Know I'm right here by your side, shawty

Skin and bones under the covers
Kept our love undercover
Nonchalant, very subtle
Tryin' not to step on the puddle

Treat me like I'm more than a pair of skin and bones
And that really made a difference in my story
Life will take its toll
But whichever way we go
Know I'm right here by your side, shawty

Yeah, what a contrast
My skin and bones against the color of your aura
On a Sunday
Walkin' slow while time was still runnin'
The moon's favorite daughter
Light in the dark, and the waves in the water
Ooh, oh yeah
If I can't be brave
And let you walk away
Maybe next life you'll be mine again
Maybe next life you'll be mine again
