Deja Vu

10 Years

Turn off my brain this all feels the same
Turn off my brain this all feels the same
So you got heart and soul
Born to break the mold
You're oh so original like someone I used to know

Turn off my brain this all feels the same
Turn off my brain this all feels the same
Time to reinvent the wheel with the thrill kill sex appeal
And a brand new point of view that feels like déjà vu
Turn off my brain this all feels the same

Everything's been said and done before
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same
I've given all I've got there's nothing more
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same

Turn off my brain this all feels the same
Turn off my brain this all feels the same
Autopilot in control destination unknown
Am I closer to the end or right back where I began
Erase all trail and trace I'll wipe the whole thing clean
Fight, love, feed, kill, repeat
Turn off my brain this all feels the same

Everything's been said and done before
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same
I've given all I've got there's nothing more
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same

Turn off the screens they all look the same
Turn off the songs they all sound the same
Turn off the screens they all look the same
Turn off the songs they all sound the same
Turn off my brain this all feels the same

Take, take, take it away

Everything's been said and done before
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same

I've given all I've got there's nothing more
Turn off my brain this all sounds the same
Turn off my brain this all sounds the same
Take, take, take it away
Take, take, take it away
