

Minus the Machine

10 Years

You're not alone
They're closer than you know
And now there's ghosts
In the machines we host

The reasons we find
Over and over we replay the ride
Deep into you
They spread their roots

Satellites
Send us a savior
Satisfy these sinful behaviors
Ooooh

We want the world in the palm of our hands
So incomplete, minus machine
Dying to know and control on command
So incomplete, minus machine
Kill the lights forever

Locked in place, pupils dilate
And stimulates, increasing our heart rate
Entranced by the light, higher and higher we try to fly
Burn in the flames, deep in the strain

Satellites
Send us a savior
Satisfy these sinful behaviors
Ooooh

We want the world in the palm of our hands
So incomplete, minus machine
Dying to know and control on command
So incomplete, minus machine
Kill the lights forever

So incomplete, minus machine
We want the world in the palm of our hands
So incomplete, minus machine
Dying to know and control on command
So incomplete, minus machine
Information overload
So incomplete, minus machine
Kill the lights forever
Kill the lights forever
