

It was some years ago
I first laid eyes on you
We both had things
We needed to work through

And residue, residue
Said it almost blind my view
Inside, girl I knew
I was supposed to be with you
I'm so glad we stood the test of our love
There's no two people anywhere
More compatible than us

So, I think it's only right
That you take my last name
I promise from now on
No residue remains

No residue, no residue
Could ever block my view
Girl inside, I always knew that
I was supposed to be with you
I'm so glad we stood the test of our, of our love
There's no two people on this Earth
That's more compatible than us

I'm glad we didn't give up
(So glad)
Give up on us
And there's no battle we can't win
If we choose love
So whenever it looks grey
And residue tries to get in the way
Now that we have made it this far
And we can go on
But I'm so glad there's no more residue
In our lives at all
There be no...
(No more residue)
