I don't know how else to tell you this  
I thank You, Lord, You saved my life  
I say Your Name and You listenin'  
I almost left, You got me right  
I came out the slums  
The dealers, the users, the bongs  
The scammers, the hustlers, and drugs  
I had enough  
I need that light of the love  
I'll never run off on the plug  
I found a better life, way too crazy  
I need shining light for clarity  
Looking for the light? All of you might as..  
Well come with me, I'll help you find it  
Blasting off, astronaut ignited  
Shine your light, take you to your highness
