

When the world was flesh and teeth  
When the days where none and the light shone not  
In a timeless fleeting ever instant  
Forever thorned in eternity's grip

Hidden everlasting  
Obscura  
Pandemics of chaos  
Obscura

Revelation-maelstroms  
As spirit-eclipse into vortex-voids  
Like a ghost in the godless spheres  
Through the multitude, pale dimensions

Into obscurity  
Inside this chamber of skin  
Into obscurity  
The ever unchanging

Upon the tide of slow eternities  
Summoning the primordial nexus  
Eyes burning black like distant stars  
Deep into myriad reflections  
In that moment of eclipsis  
Foreshadowed, through the arcane dark  
Into obscurity of the shadow of Hell  
Infinity without depth or dimension

Hell-tongue speak the hidden words  
Breathing vacuum, spitting fire

Hidden everlasting  
Obscura  
Pandemics of chaos  
Obscura  
Obscura
