

# Never Another

## 13th Floor Elevators

The story you are living from the other symphony  
Insures such coolness inside my heart of love in harmony  
Your simplest pleasure echoes out your entire destiny  
Our fates combined will have no end  
Give your love to me

I groove on yours  
Change in mine  
It's bright  
It's in our hearts combined  
It's not chance wait with you now our thing happens  
Right on time

Hate to see that our two backs cannot make one human  
Freedom palace burns our souls and makes up all the new ones  
No more aces you can leave me  
And just some one lead me where  
Where to get faces but that won't leave me  
Where you're sure is just out there  
It's only I love you when you need me  
It's only I love you goddamn  
It's only I love you  
Forgive me  
And the genus us all we share  
Never another line and another lie

Do what you would do what you did
