

# Pluto

2 Skinnee J's

With depravity I break laws of gravity  
Blast past the atmosphere to the last frontier  
I go boldly through space and time  
The skies the limit but they're limiting the sky

I break orbit by habit, ignite satellites and leave rings round  
the planet  
A flying ace like that beagle  
Nevertheless this alien remains illegal  
'Cause their discovery don't cover me

The immigrant's been left in the cold to grow old and disintegrate  
Discriminate against the distant and disclaim this  
'Cause small minds can't see past Uranus  
But I shun their rays, 'cause stuns just a phase

And my odyssey runs in two thousand and one ways  
And I can see clearly now like Hubble,  
Shoved off the shuttle, here's my rebuttal  
It's a planet

Who you represent? I represent the smallest planet  
Attorney in this tourney versus those who've tried to ban it  
If you don't agree go see Interplanet Janet  
'Cause sun is star, like Pluto is planet

Lend me all your ears and let me state my case  
About all the types of satellites you must embrace  
'Cause like my parents, great grandparents  
This planet was an immigrant

To deport it makes no sense  
It's an upstanding member of the solar system  
Apply the laws of earth and make it a victim  
Of Proposition 187

When Pluto spawns a moon it will apply to the heavens  
I will damn thee like Judas of Iscariot  
If you demote this mote remote to affiliate  
It's like taking ET's custody from Elliot  
Support your Lilliput, cause simply put

Pluto is a planet
