

## Same Night Sky

2AM Club

I wish you'd give me what I'm looking for  
I hit the light switch, then hit the front door  
I say farewell to the western front  
I'm having second thoughts,  
I may have jumped the gun  
We walked we stopped in your stereo  
I really wanna be the color in your video  
It's my it's my shotgun wedding with  
The big city and I'm working on my etiquette  
Cuz everybody wants it  
And everybody needs it  
Everybody wants it  
And everybody needs...

Oh you don't have to say goodbye  
Nothing's gonna pass you by  
Looking at the same night sky  
We'll be there waiting for you getting high  
Everything will be all right  
Looking at the same night sky

I can't give in I've worked too hard for this  
I let the stress build, I sit and ball my fists  
This town gets cold I pull the wool down  
I look up at the stars, they hit the wet ground  
We walked we stopped in your stereo  
I really wanna be the color in your video

It's my it's my shotgun wedding with  
The big city and I hope I don't get over it  
Cuz everybody wants it  
And everybody needs it  
Everybody wants it  
And everybody needs...

Oh you don't have to say goodbye  
Nothing's gonna pass you by  
Looking at the same night sky  
We'll be there waiting for you getting high  
Everything will be all right  
Looking at the same night sky

So  
They got me crying on my sleeve  
That's where I keep my heart so it don't dry up  
They say I'm living out my dreams  
Well that's my luck  
Was it my dream when my father went falling down  
I only felt one thing that's how I know now  
I miss the days and the folks that I shared them with  
This song right here goes out to all that cared a bit  
So many thought that I would never reach the plane I'm  
at  
But ya'll knew better than that  
And when I'm lonely  
You'll always be my only  
And I'll be yours in time

Oh you don't have to say goodbye  
Nothing's gonna pass you by  
Looking at the same night sky  
We'll be there waiting for you getting high  
Everything will be all right  
Looking at the same night sky

Whoa you don't need to say goodbye.
